### **Background**

HHSC is responsible for the reimbursement determination functions for the Texas Medicaid Program. Proposed rates are calculated utilizing established methodologies that conform to the Social Security Act and related federal regulations, the federally approved Texas Medicaid State Plan, all applicable state statutes and rules, and other requirements. HHSC reviews the Medicaid reimbursement rates for all acute care services every two years. These biennial reviews result in rates that are increased, decreased, or

remain the same. The reviews are conducted to ensure that rates continue to be based on established rate methodologies.

### **Methodology**

The specific administrative rules that govern the establishment of the fees in this proposal include these rules in 1 TAC:

- §355.8085, which addresses the reimbursement methodology for physicians and other practitioners;

### **Proposed Rate Adjustments**

A summary of the methodologies used to determine the proposed fee-for-service Medicaid rates is listed below:

- Access-based fees (ABFs) allow the state to reimburse for procedure codes not covered by Medicare or for which the Medicare fee is inadequate, or account for particularly difficult procedures, or encourage provider participation to ensure access to care.
- ABFs may also be established based on the Medicare fee for a service that is not priced using Relative Value Units (RVUs).
- For services and items that are not covered by Medicare or for which the Medicare rate is insufficient, different approaches are used to develop fees based on available information. These alternate methods include, as applicable:
  - The median or mean of the Medicaid fees from 14 states (the 10 most populous and the 4 bordering Texas) or the median or mean of the states that cover the service
  - The current Medicaid fee for a similar service (comparable code)

Specific proposed payment rate adjustments are listed in the attachments outlined below:
