### **Definitions:**

Cognizant agency—the agency responsible for reviewing, negotiating, and approving cost allocation plans or indirect cost proposals developed in accordance with the Office of Management and Budget Circular A-87.

Commercial Pay Insurance—health insurance that covers medical expenses and disability income for the insured. Commercial health insurance can be categorized according to its renewal provisions and type of medical benefits provided. Commercial policies can be sold individually or as part of a group plan.

Cost Allocation Plans—are the means by which costs are identified in a logical and systematic manner for reimbursement under federal grants and agreements.

Cost-to-charge-ratio (CCR) — a provider's reported costs are allocated to the uninsured charity Care based on a cost-to-billed-charge ratio. Cost-to-billed charge ratio is calculated as total allowable cost reported for the service period divided by total billed charges for the service period. This ratio is then applied to total billed charges associated with Medicaid paid claims to calculate total allowable billed charges for the cost report.

Direct Cost—means any cost which is identified specifically with a particular final cost objective.

Direct costs are not limited to items which are incorporated in the end product as material or labor.

Costs identified specifically with a contract are direct costs of that contract. All costs identified specifically with other final cost objectives of the contractor are direct costs of those cost objectives.

Federal Medical Assistance Percentage (FMAP)—the share of state Medicaid benefit costs paid for by the federal government.

Indirect Costs—cost incurred and identified with having two or more cost objectives but not specifically identified with any final cost objective.

Indirect Cost Rate—a device for determining in a reasonable manner the proportion of indirect costs each program should bear. It is the ratio, expressed as a percentage, of the indirect costs to the direct costs.

Intergovernmental Transfers (IGT)—State and local funds derived from taxes, assessments, levies, investments, and other public revenues within the sole and unrestricted control of a governmental entity and eligible for federal match under the 1115 Transformation Waiver. This does not include gifts, grants, trusts, or donations, the use of which is conditioned on supplying a benefit solely to the donor or grantor of the funds.

Medicaid Fee-For-Service (FFS)—the traditional health care payment system, in which providers receive a payment for each unit of service they provide

Medicaid Managed Care (MCO)—an entity that provides or contracts for managed health care. Medicaid payments are made by the MCOs to providers for services provided to Medicaid recipients.

Medicare—a federal system of health insurance for those who are 65 and older, disabled or have permanent kidney failure.

Self-Pay—an individual who either does not have insurance or her/his insurance does not cover a particular procedure or provider and therefore, the individual is responsible for paying the provider.

Texas Healthcare Transformation and Quality Improvement Program 1115 Waiver—the vehicle approved by HHSC and CMS for implementation of the waiver program under section 1115 of the Social Security Act.

Uncompensated Care (UC)—costs of uninsured charity care provided to individuals who have no funds or third party coverage for services provided by medical, dental or other providers.

Uninsured—an individual who has no health insurance or other source of third-party coverage for medical/health services.

Uninsured cost--the cost to provide dental services to uninsured patients as defined by the Centers for Medicare and Medicaid Services. An individual whose third-party coverage does not include the service provided is considered by HHSC to be uninsured for that service.

Unit of government—a state, city, county, special purpose district or other governmental unit in the State that: has taxing authority, has direct access to tax revenues, is a State university teaching hospital with direct appropriations from the State treasury, or is an Indian tribe as defined in Section 4 of the Indian Self-Determination and Education Assistance Act, as amended (25 U.S.C. 450b).

## **Dental Cost Settlement**

### **DIRECTIONS TO COMPLETE Dental Cost Settlement**

Worksheet 3 identifies and summarizes all dental services costs. Much of the information contained

within this worksheet is automatically pulled from other worksheets; however, there are unique items of cost that must be entered in this worksheet. Only allocable expenditures related to Uninsured Charity care as defined and approved in the Texas Healthcare Transformation and Quality Improvement 1115 Waiver Program will be included for supplemental payment. Direct cost methods must be used whenever reasonably possible. Direct costing means that allowable costs, direct or indirect, incurred for the benefit of, or directly attributable to, a specific business component must be directly charged to that particular business component.

Direct cost accounting may include:

Dedicated Cost Centers: Cost may be included for those cost centers that are solely dedicated to

Uninsured Charity Care. This worksheet sums the payroll expenses and adds other costs to calculate the allowable cost of dental services. Identified reductions are subtracted to calculate the adjusted amount of dental costs allowable as part of the cost report. The cost report identifies the portion of allowable charges that are related to Uninsured Charity Care, then multiplies these charges by a Cost to Charge ratio that is based on total facility charges and costs to calculate the allowable Uninsured Charity care costs within the cost report period. This cost is then reduced by any reimbursement received for uninsured Charity patients. The resulting shortfall is the total allowable cost for the facilities' payment and is then multiplied by the applicable Federal Medical Assistance Percentage (FMAP) to calculate the Federal and State amounts. Please note that this final amount is subject to a further reduction based on available Uncompensated Care (UC) dollars when the UC payment is calculated. This worksheet is separated into the sections identifying:
