## I. Introduction

Rudd and Wisdom, Inc. has been retained by the Texas Health and Human Services Commission (HHSC) to develop the state fiscal year 2015 (FY2015, September 1, 2014 through August 31, 2015) premium rates for HMOs participating in the Texas Medicaid STAR program. This report presents the rating methodology and assumptions used in developing the premium rates.

Rudd and Wisdom has provided actuarial services to the Texas Medicaid program for over 25 years. We have participated in the state's managed care rating process since its inception in 1993. This year, as in previous years, we have worked closely with HHSC in developing the FY2015 HMO premium rates.

Rudd and Wisdom has relied on the following data sources as provided by HHSC, the participating HMOs and the agency's External Quality Review Organization (EQRO):

- Monthly enrollment by risk group and age group for each health plan. This includes historical enrollment since September 2010 and a projection of future enrollment through August 2015. These projections were prepared by HHS System Forecasting staff.
- Claim lag reports by risk group and age group for each health plan for the period September 2010 through February 2014. These reports include monthly paid claims by month of service.
- Financial Statistical Reports (FSR) for each participating HMO for FY2012, FY2013 and the first six months of FY2014. The FSR contains detailed information regarding monthly enrollment, revenue, incurred claims and administrative expenses, as reported by the HMO.
- Reports from the EQRO summarizing their analysis of the HMO's encounter claims data.
- Reports from the health plans providing information on high volume claimants during the experience period.
- Current (FY2014) premium rates and Delivery Supplemental Payment rates by risk group for each HMO.
- The number of maternity deliveries by HMO and risk group for the period September 2010 through December 2013.
- Information from both HHSC and the HMOs regarding recent changes in covered services and provider reimbursement under the Medicaid program.
- Information from the HMOs regarding current and projected payment rates for certain capitated services, such as mental health and vision.
- Information regarding FY2013 third party reimbursement from each of the HMOs.
- FY2013 acuity risk adjustment analysis provided by the EQRO for each participating health plan.
- Information from the HMOs regarding current and projected reinsurance premium rates.

- Historical enrollment and claims experience data for the Medicaid Primary Care Case Management (PCCM) plan.
- Information provided by HHSC regarding FY2013 health plan claims cost by type of service for certain services. This information was obtained from the encounter database.
- Information provided by HHSC regarding proposed FY2015 Medicaid provider reimbursement rates.
- Information provided by HHSC regarding newly capitated services previously paid by HHSC.

Although the above data was reviewed for reasonableness, Rudd and Wisdom did not audit the data.

## II. Overview of the Rate Setting Methodology

This report details the development of the medical component of the total premium rate. Information regarding the carve-in of prescription drugs into the STAR program can be found in the report titled State of Texas Medicaid Managed Care Rate Setting Pharmacy Carve-in State Fiscal Year 2015.

The actuarial model used to derive the FY2015 STAR HMO premium rates relies primarily on health plan financial experience. The historical claims experience for each HMO (by area) was analyzed and estimates for the base period (FY2013) were developed. These estimates were then projected forward to FY2015 using assumed trend rates. Other plan expenditures such as capitated amounts, reinsurance costs and administrative expenses were added to the claims component in order to project the total FY2015 cost under the health plan. These projected total cost rates were determined separately for each risk group for each health plan. The results of this analysis were then combined for all HMOs in a service area in order to develop a set of community rates for each service area.

The managed care service areas used in the analysis were as follows:

- Bexar County Service Area (San Antonio)
- Dallas County Service Area (Dallas)
- El Paso County Service Area (El Paso)
- Harris County Service Area (Houston)
- Hidalgo County Service Area (Hidalgo)
- Jefferson County Service Area (Beaumont)
- Lubbock County Service Area (Lubbock)
- Nueces County Service Area (Corpus Christi)
- Tarrant County Service Area (Fort Worth)
- Travis County Service Area (Austin)
- Central Medicaid Rural Service Area (MRSA Central)
- Northeast Medicaid Rural Service Area (MRSA Northeast)
- West Medicaid Rural Service Area (MRSA West)

The risk groups (or rating populations) used in the analysis are as follows:

- Under Age One Year
- Ages 1 - 5
- Ages 6 - 14
- Ages 15 - 18
- Ages 19 - 20
- TANF Adults
- Pregnant Women

The services used in the analysis include the following:

- Inpatient Hospital
- Outpatient Hospital
- Physician Services

- Other Professional Services
- Lab, X-ray and Radiology Services
- Medical Supplies
- Behavioral Health Services (except in the Dallas service area)
- EPSDT Medical Services
- Family Planning and Genetics Services
- Comprehensive Care Program Services
- Vision Services
- Hearing Services
- Home Health Services
- Emergency Room Services
- Ambulance Services
- Prescription Drugs

Services specifically excluded from the analysis include:

- Dental and Orthodontia Services

After accumulating all of the information to be used in the rate setting process, a comparison of the various sources of claims data was performed to check for consistency. We compared (i) the claim lag reports provided by the HMOs, (ii) the claim amounts reported in the FSRs and (iii) the claim amounts in the encounter data files as provided by the EQRO. There was satisfactory consistency between the three claims data sources for each of the health plans.

We projected the FY2015 cost for each individual HMO by estimating their base period (FY2013) average claims cost and then applying trend and other adjustment factors. These adjustment factors are described in Section III. We added capitation expenses for services capitated by the HMO (such as vision and behavioral health), a net cost of reinsurance, a reasonable provision for administrative expenses and a risk margin. Attachment 2 presents a description and an example of the experience analysis for a sample HMO. This type of analysis was conducted for each health plan.

The analysis of base period claims experience for each health plan attempted to identify and adjust for any distortions in the data. Significant variations in experience, including the impact from unusually large individual claims, were investigated and adjustments were made if deemed appropriate.

HHSC utilized the combination of two rating methodologies in setting the FY2015 STAR premium rates – individual plan experience rating and community rating. The individual plan experience rating method is described above and documented in Attachment 2. The community rates are developed by a weighted average of the projected FY2015 cost for each health plan in the service area. The weights used in this formula are the projected FY2015 number of clients enrolled in each health plan by risk group. Attachment 3 presents the summary community rating exhibit for each service area along with a description of the analysis.

The projected FY2015 average total per-capita cost in a service area is called the unadjusted premium rate. This rate includes provision for all health care and administrative services to be provided by the HMO. This rate is then separated into two components – (i) non-maternity related expenses and (ii) maternity expenses. The premium rate for non-maternity expenses is called the adjusted premium rate. These are the monthly rates paid to the HMO. The amount paid for maternity expenses is called the Delivery Supplemental Payment. More information on this adjustment is provided in Section III below under Risk Adjustment and in Attachment 8.

The base community rate in each service area was adjusted to reflect the health status, or acuity, of the population enrolled in each health plan. The purpose of acuity risk adjustment is to recognize the anticipated cost differential between multiple health plans in a service area by analyzing the health status of their respective memberships. Additional information regarding risk adjustment is included in Section III below under Risk Adjustment and in Attachment 9.

The FY2015 STAR health plan premium rates were then defined as the following: the minimum of (a) 110% of the rate developed using the individual experience of the plan and (b) community rate with risk adjustment.

### III. Adjustment Factors

This section contains a description of the adjustment factors used in the FY2015 STAR rate setting process.

#### *Trend Factors*

The rating methodology uses assumed trend factors to adjust the base period claims cost to the projection period. The cost trend factors used in this analysis are a combination of utilization and inflation components. The projected trend rate assumptions were developed by the actuary based on an analysis of recent experience under the various HMO plans. A single trend assumption applies to all service areas but varies by risk group and projection year (FY2014 and FY2015).

The trend analysis included a review of HMO claims experience data through February 28, 2014. Based on this information, estimates of monthly incurred claims were made through December 2013. The claims cost and trend experience was reviewed separately by service area and risk group. The service area trends were then combined into a statewide average using a weighted average formula with estimated incurred claims as the weights.

The FY2014 trend assumptions were developed from two components: (i) the actual estimated trend for the period September 2013 through December 2013 and (ii) the projected trend for the period January 2014 through August 2014. The experience trends for all time periods were adjusted to remove the impact of various provider reimbursement changes and other revisions that have impacted the program. The trends for the final eight months of FY2014 were projected using experience from FY2010 (1/4 weight), FY2011 (1/4 weight), FY2012 (1/4 weight) and FY2013 (1/4 weight). The FY2015 trend assumptions were then developed from a simple average of the FY2010 trend, FY2011 trend, FY2012 trend and FY2013 trend.

All historical trends for FY2010 through FY2013 used in the methodology described above were limited to be no less than 0.0%.

Attachment 4 is a summary of the cost trend analysis. The chart below presents the assumed annual trend rates for FY2014 and FY2015.

	<u>FY2014</u>	<u>FY2015</u>
Under Age 1 Year	1.2 %	2.8 %
Ages 1 - 5	1.4 %	4.2 %
Ages 6 - 14	2.3 %	4.2 %
Ages 15 - 18	1.0 %	3.5 %
Ages 19 - 20	9.3 %	14.4 %
TANF Adults	2.1 %	2.7 %
Pregnant Women	0.2 %	0.8 %

### ***Provider Reimbursement Adjustments***

Medicaid provider reimbursement changes were recognized for the following services: APR DRG implementation, Potentially Preventable Readmission reimbursement reductions, Potentially Preventable Complication reimbursement reductions, 10% reduction for inpatient outlier reimbursement, revisions to the therapy fee schedule, outpatient facility reimbursement reductions, outpatient imaging reimbursement reductions, ambulance reimbursement reductions, revisions to emergency room reimbursement provisions for non emergent services, reduction of Medicaid reimbursement in excess of Medicare and the impact of FQHC acquisition of primary care provider practices.

The rating adjustments for these provider reimbursement changes were calculated by applying actual health plan encounter data to the old and new reimbursement basis and the resulting impact determined. Attachment 5 presents a summary of the derivation of these adjustment factors.

### ***Newly Capitated Services***

Effective September 1, 2014 mental health rehabilitation and targeted case management services will become capitated services under the STAR Program. Previously these services were carved out of STAR and paid on a fee-for-service basis. Exhibit M of Attachment 5 presents a summary of the derivation of these adjustment factors.

### ***Related Party Adjustments***

Beginning in FY2011, HHSC revised the rating methodology to exclude from the claims experience base any amounts paid by a health plan to a related party in excess of 100% of Medicaid. HHSC staff met with the health plans individually to determine (i) which providers had an owner-relationship to the health plan and (ii) the basis on which the health plan reimbursed the provider. All health plans in the affected service areas were impacted because the related party adjustment lowered the community rate applicable to all of the plans in that area. Exhibit A of Attachment 5 presents a summary of the derivation of these adjustment factors.

### ***APR DRG Adjustments***

Effective September 1, 2012, HHSC implemented the APR DRG reimbursement system for most hospitals. Effective September 1, 2013 rural hospital and children's hospitals transitioned to the APR DRG reimbursement system. HHSC staff has utilized the FY2013 encounter data to determine the cost impact from the APR DRG implementation on each service area and risk group. Exhibit I of Attachment 5 presents a summary of the resulting adjustment factors.

### ***Family Planning Exclusion***

Some of the MCOs that participate in the STAR program do not provide family planning services. HHSC provided a listing of those services that will not be provided by these MCOs. Adjustment factors were determined through an evaluation of the base period experience for the areas in which these plans operate. The premium rates for these MCOs have been reduced to reflect the reduced level of services provided. Attachment 6 provides additional information regarding this adjustment.

### ***Third Party Recoveries***

The rating methodology includes a factor to recognize those health plans that do not satisfy a minimum level of recoveries for coordination of benefits. Any plan that did not recover at least 2.0% of claims had its projected claims cost reduced by 2.0% less their actual percentage of recoveries. For example, if a health plan has third party recoveries (TPR) of 1.5% of claims, then their projected claims cost would be reduced by 0.5%. Any plan that exceeded the minimum standard of 2.0% had no penalty applied. Additional information regarding TPR is included in Attachment 7.

### ***Risk Adjustment***

Several risk adjustment techniques are employed in the rate setting methodology. Premium rates are established separately by area of the state and risk group in order to recognize the inherent geographical and demographical variation in the cost of delivering care. In an attempt to treat the health plans more equitably regarding maternity expenses, the methodology includes a separate rate for maternity services. In addition, the rating methodology includes a health status adjustment.

The rate setting methodology incorporates a risk adjustment technique that is designed to provide uniform treatment of the health plans for costs related to maternity services. Maternity cases occur in several risk groups – Pregnant Women, TANF Adults, Ages 15-18, and Ages 19-20. As a result, it is possible for one health plan to enroll a higher percentage of TANF Adults, for example, who are pregnant and therefore generally more expensive. In order to recognize the potential inequity that may arise between health plans, HHSC developed this risk adjustment methodology. The goal is to reimburse the plans uniformly for maternity delivery costs.

The State pays a delivery supplemental payment (DSP) for each delivery in a managed care plan. The amount of the payment is a function of the average delivery cost in the service area. Attachment 8 contains additional information regarding the DSP payment amounts.

In order to achieve cost neutrality, the projected cost of maternity expenses is subtracted from the unadjusted premium rates. The resulting adjusted premium rates are the rates actually paid to the HMOs, in addition to any DSP amounts.

The base community rate in each service area was adjusted to reflect the health status, or acuity, of the population enrolled in each health plan. The purpose of acuity risk adjustment is to recognize the anticipated cost differential between multiple health plans in a service area by analyzing the health status of their respective memberships. The risk analysis was performed by the University of Florida's Institute for Child Health Policy (ICHP). The methodology used to incorporate the acuity risk adjustment is the Chronic Illness and Disability Payment System (CDPS). Additional information regarding acuity risk adjustment is included in Attachment 9.

Although the results of the risk adjustment analysis were reviewed for reasonableness, Rudd and Wisdom did not audit the risk adjustment data or the results of ICHP's analysis.

#### IV. Administrative Fees and Risk Margin

The rating methodology includes an explicit provision for administrative services. The amount allocated for administrative expenses is \$8.00 pmpm plus 5.75% of gross premium. This amount is intended to provide for all administrative-related services performed by the HMO.

The administrative fee amounts were determined based on a review of (i) the administrative fee provision included in Medicaid HMO premium rates in other states, (ii) the reported administrative expenses of the STAR HMOs and (iii) the fees paid for similar services for other large Texas health plans.

The premium rates also include an amount for premium tax (1.75% of premium), maintenance tax (\$0.065 pmpm) and a risk margin (2.0% of premium).

## V. Summary

The chart below presents the results of the FY2015 STAR rating analysis and includes all components of the premium – medical and prescription drug. This report details the development of the medical component of the premium. Further information regarding the prescription drug component of the premium rate can be found in the report titled State of Texas Medicaid Managed Care Rate Setting Pharmacy Carve-in State Fiscal Year 2015.

	Under Age 1	Ages 1-5	Ages 6-14	Ages 15-18	Ages 19-20

Superior - MRSA West	402.98	429.38	3,204.07

The above premium rates include provision for 1915(b)(3) waiver services. The STAR HMOs cover adult inpatient hospital days in excess of thirty. The chart below presents the amount included in the FY2015 STAR HMO premium rates for 1915(b)(3) waiver services.

Health Plan	TANF Adults	Pregnant Women
Monthly Premium Rate for 1915(b)(3) Services		
All Plans/All Areas	\$ 3.85	\$ 2.56

Attachment 1 presents additional information regarding the FY2015 rates.

## VI. Actuarial Certification of FY2015 STAR HMO Premium Rates

I, Evan L. Dial, am a principal with the firm of Rudd and Wisdom, Inc., Consulting Actuaries (Rudd and Wisdom). I am a Fellow of the Society of Actuaries and a member of the American Academy of Actuaries. I meet the Academy's qualification standards for rendering this opinion.

Rudd and Wisdom has been retained by the Texas Health and Human Services Commission (HHSC) to assist in the development of their state fiscal year 2015 (FY2015) managed care rate-setting methodology, assumptions and resulting premium rates and to provide the actuarial certification required under Centers for Medicare and Medicaid Services (CMS) requirements 42 CFR 438.6(c).

I certify that the FY2015 HMO premium rates developed by HHSC and Rudd and Wisdom satisfy the following:

- (a) The premium rates have been developed in accordance with generally accepted actuarial principals and practices;
- (b) The premium rates are appropriate for the populations and services covered under the managed care contract; and
- (c) The premium rates are actuarially sound as defined in the regulations.

We have relied on historical experience data and program information provided to us by HHSC. We have reviewed the data for reasonableness but have not audited the data.

Please note that actual health plan contractor experience will differ from these projections. Rudd and Wisdom has developed these rates on behalf of the State to demonstrate compliance with the CMS requirements under 42 CFR 438.6(c). Any health plan contracting with the State should analyze its own projected premium needs before deciding whether to contract with the State.

---

Evan L. Dial, F.S.A., M.A.A.A.

Summary of FY2015 STAR Rating Analysis

The attached exhibit presents summary information regarding the FY2015 rates. Included on the exhibits are current (FY2014) premium rates, split between medical and prescription drug, and delivery supplemental payment (DSP) rates, FY2015 premium rates, split between medical and prescription drug, and DSP rates and a comparison of FY2014 and FY2015 premium rates.

## FY2015 STAR Rating Summary

### Individual HMO Experience Analysis

The following exhibits present a summary of the experience analysis performed for each health plan. The exhibits in this section use hypothetical experience data from a sample HMO. The actual analysis is based on experience data provided by each health plan. This data was checked for reasonableness by comparing to other data sources provided by HHSC, the EQRO and the HMO. Below is a brief description of each of the exhibits contained in this attachment.

Exhibit A. This exhibit shows monthly enrollment and number of maternity deliveries by risk group for the period September 2011 through February 2014. All of this information was provided by HHSC.

Exhibit B. This exhibit shows a sample of a claim lag report for one risk group. This report includes claim amounts by payment month and month of service. We analyzed claims experience for the period September 2010 through December 2013.

Exhibit C. This exhibit shows the calculation of estimated monthly incurred claims for one risk group. The report includes the following information: (i) monthly enrollment, (ii) claim amounts incurred in that month and paid through February 28, 2014, (iii) estimated proportion of that month's incurred claims paid through February 28, 2014 (completion factor), (iv) estimated incurred claims, (v) estimated incurred claims pmpm and (vi) the ratio of this month's incurred claims pmpm to the same statistic from one year ago (trend factor). The assumed completion factors and estimated incurred claims were derived based on the actual historical claims payment pattern of the HMO.

Exhibit D. This exhibit is a summary of the sample HMO's projected FY2015 cost based on the HMO's actual experience. The top of the exhibit shows summary base period (FY2013) enrollment and claims experience. Next is projected FY2015 enrollment. Trend assumptions for FY2014 and FY2015 are used to project the average base period claims cost to FY2015. Adjustment factors are used to recognize the cost impact of benefit and provider reimbursement changes. Combining these factors results in projected FY2015 incurred claims.

In addition to incurred claims, provision is also made for services that are capitated by the HMO, such as vision and behavioral health services. The cost of reinsurance is also considered. In developing the cost of reinsurance, an assumption is made regarding how much the HMO is expected to receive in reinsurance recoveries (reimbursements from the reinsurance company for large claims). We have assumed that the net cost of reinsurance (reinsurance premium less reinsurance recoveries) is the minimum of (a) the actual reinsurance premium rate and (b) \$0.75 pmpm.

A provision for administrative expenses is included in the amount of \$8.00 pmpm and 5.75% of gross premium. Additional provisions are also included for premium tax (1.75% of premium), maintenance tax (\$0.065 pmpm) and risk margin (2.0% of premium).

At the bottom of Exhibit D is a summary of the projected FY2015 cost based on the above assumptions. Cost projections are presented both with and without the inclusion of maternity expenses.

#### Community Experience Analysis

The following exhibits present a summary of the experience analysis performed for each managed care service area. HHSC utilizes an adjusted community rating methodology in setting the STAR premium rates. The base community rates by risk group vary by service area but are the same for each HMO in a service area. The community rates are developed by a weighted average of the projected FY2015 cost for each health plan in the service area. The weights used in this formula are the projected number of FY2015 clients enrolled in each health plan.

Below is a brief description of the exhibits contained in this attachment. The exhibits present the derivation of the FY2015 STAR HMO community rates for the following service areas:

- Exhibit A – Bexar Service Area
- Exhibit B – Dallas Service Area
- Exhibit C – El Paso Service Area
- Exhibit D – Harris Service Area
- Exhibit E – Hidalgo Service Area
- Exhibit F – Jefferson Service Area
- Exhibit G – Lubbock Service Area
- Exhibit H – Nueces Service Area
- Exhibit I – Tarrant Service Area
- Exhibit J – Travis Service Area
- Exhibit K – MRSA Central Service Area
- Exhibit L – MRSA Northeast Service Area
- Exhibit M – MRSA West Service Area

These exhibits show projected FY2015 experience for each of the service areas. These amounts were derived by summing amounts from each individual health plan in the service area. The experience analysis for individual HMOs is described in Attachment 2. The top portion of the exhibit shows summary base period (FY2013) experience and projected FY2015 enrollment and incurred claims experience.

In addition to incurred claims, provision is also made for services that are capitated by the HMOs, such as vision and behavioral health services. The cost of reinsurance is also considered. In developing the cost of reinsurance we make an assumption regarding how much the HMO is expected to receive in reinsurance recoveries (reimbursements from the reinsurance company for large claims). We have assumed that the net cost of reinsurance (reinsurance premium less reinsurance recoveries) is the minimum of (a) the actual reinsurance premium rate and (b) \$0.75 pmpm.

A provision for administrative expenses is included in the amount of \$8.00 pmpm and 5.75% of gross premium. Additional provisions are also included for premium tax (1.75% of premium), maintenance tax (\$0.065 pmpm) and risk margin (2.0% of premium).

The bottom of the exhibit shows a summary of the projected FY2015 cost based on these assumptions. Cost projections are presented both with and without the inclusion of maternity expenses

### Trend Analysis

The FY2015 rating methodology uses assumed trend factors to adjust the base period claims cost to the projection period. The cost trend factors used in this analysis are a combination of utilization and inflation components. The projected trend rate assumptions were developed by the actuary based on an analysis of recent experience under the various HMO plans. A single trend assumption applied to all service areas but varies by risk group and year.

The trend analysis included a review of HMO claims experience data through February 28, 2014. Based on this information, estimates of monthly incurred claims were made through December 2013. The claims cost and trend experience was reviewed separately by service area and risk group. The service area trends were then combined into a statewide average using a weighted average formula with estimated incurred claims as the weights.

The FY2014 trend assumptions were developed from two components: (i) the actual estimated trend for the period September 2013 through December 2013 and (ii) the projected trend for the period January 2014 through August 2014. The experience trends for all time periods were adjusted to remove the impact of various provider reimbursement changes and other revisions that have impacted the program. The trends for the final eight months of FY2014 were projected using experience from FY2010 (1/4 weight), FY2011 (1/4 weight), FY2012 (1/4 weight) and FY2013 (1/4 weight). The FY2015 trend assumptions were then developed from a simple average of the FY2010 trend, FY2011 trend, FY2012 trend and FY2013 trend.

All historical trends for FY2010 through FY2013 used in the methodology described above were limited to be no less than 0.0%.

The attached exhibits present recent trend experience under the HMO plans (Exhibit A) and the trend assumptions used in the rating analysis (Exhibit B). The chart below presents the assumed annual trend rates for FY2014 and FY2015.

	<u>FY2014</u>	<u>FY2015</u>
Under Age 1	1.2 %	2.8 %
Ages 1 - 5	1.4 %	4.2 %

## *Attachment 5*

### Provider Reimbursement and Benefit Revisions Effective During FY2013, FY2014 and FY2015

This attachment presents information regarding rating adjustments for the various provider reimbursement and benefit revisions that became effective (or will become effective) after the base period used in rate setting (FY2013) and before the end of FY2015.

Effective September 1, 2010, HHSC revised the rating methodology to exclude from the claims experience base any amounts paid by a health plan to a related party in excess of 100% of Medicaid. Attached Exhibit A presents a summary of the derivation of the rating adjustment factors.

Effective September 1, 2013, HHSC implemented revisions to the therapy fee schedules. Reimbursement was reduced by 2.5% for Comprehensive Outpatient Rehabilitation Facilities/Outpatient Rehabilitation Facilities (CORFs/ORFs), 4% for independent therapist operating in an office setting, and 1.5% for therapy services provided inside the home. Exhibit B presents a summary of the derivation of the rating adjustment factors.

Effective September 1, 2013 HHSC will implement an outpatient hospital reduction of 5.3 percent, which excludes clinical lab and outpatient imaging services. This reduction does not apply to children's hospitals, rural hospitals, or state-owned teaching hospitals. Exhibit C presents a summary of the derivation of the rating adjustment factors.

Effective September 1, 2013 HHSC revised the reimbursement for non emergent services provided in an emergency room. These changes will include the following:

- Reimbursement will be restricted when an individual returns to the emergency department within a 36 hour period.
- Reimbursement will be restricted for non-urgent visits in excess of 24 per year.
- Non-urgent visits will be reimbursed using a flat fee.

Exhibits D and E presents a summary of the derivation of the rating adjustment factors for non emergent services delivered in an emergency room.

Effective September 1, 2013 HHSC reduced hospital imaging reimbursement to 125% of the amount reimbursed for imaging performed in a physician's office. Exhibit F presents a summary of the derivation of the rating adjustment factors.

Effective September 1, 2013 HHSC reduced ambulance reimbursement by 5%. Exhibit G presents a summary of the derivation of the rating adjustment factors.

Effective September 1, 2013 HHSC reduced all Medicaid rates that are in excess of Medicare. Exhibit H presents a summary of the derivation of the rating adjustment factors.

Effective September 1, 2012 HHSC implemented the APR-DRG reimbursement system for all hospitals excluding rural, children's and state owned teaching facilities. Effective September 1, 2013 HHSC transitioned all rural and children's facilities to the APR-DRG reimbursement

system. Exhibit I presents a summary of the derivation of the rating adjustment factors.

Effective September 1, 2013 HHSC reduced the outlier portion of facility reimbursement by 10%. Children's hospitals are excluded from this reduction. Exhibit J presents a summary of the derivation of the rating adjustment factors.

Effective May 1, 2013 HHSC implemented revisions to hospital reimbursement to account for Potentially Preventable Readmissions (PPR). The reimbursement reductions amount to 1-2% depending on a hospital's performance during the evaluation time period. Exhibit K presents a summary of the derivation of the rating adjustment factors.

Effective March 1, 2014 HHSC implemented revisions to hospital reimbursement to account for Potentially Preventable Complications (PPC). The reimbursement reductions amount to 2-2.5% depending on a hospital's performance during the evaluation time period. Exhibit L presents a summary of the derivation of the rating adjustment factors.

Effective September 1, 2014 mental health rehab and targeted case management services will be capitated under the program. Prior to this time these services were paid on a fee-for-service basis. Exhibit M presents a summary of the derivation of the rating adjustment factors.

Over the past 12 to 18 months a small number of Federally Qualified Health Centers (FQHCs) have aggressively expanded their practices through the acquisition of primary care provider practices in select service areas. This acquisition pattern has the potential to negatively impact an MCO since FQHCs are required to be reimbursed the full encounter rate by the MCO. Through the acquisition of a provider practice by an FQHC the required reimbursement can increase dramatically from the primary care provider fee schedule to the much higher FQHC specific encounter rate. This FQHC expansion was reviewed and an adjustment was made if the growth was deemed to be above and beyond the normal level of expected growth due to this acquisition of provider practices. Exhibit N presents a summary of the derivation of the rating adjustment factors.

## Footnotes:

- (1) Equals the cost impact from application of the reimbursement changes to therapy services effective 9/1/2013.  
 (2) Equals FY2013 health plan fee-for-service claims for all services (ICHP provided encounter data).  
 (3) Additional cost divided by FY2013 Total Incurred Claims.

## Footnotes:

- (1) Equals the cost impact from application of the 5.3% reduction in outpatient facility reimbursement. The reimbursement reduction was effective 9/1/2013 and excludes rural hospitals, children's hospitals and state owned teaching hospitals.
- (2) Equals FY2013 health plan fee-for-service claims for all services (ICHP provided encounter data).
- (3) Additional cost divided by FY2013 Total Incurred Claims.

## Footnotes:

- (1) Equals the cost impact from application of the reimbursement limitation for non emergent service within 36 hours of a previous visit.
- (2) Equals FY2013 health plan fee-for-service claims for all services (ICHP provided encounter data).
- (3) Additional cost divided by FY2013 Total Incurred Claims.

## Footnotes:

- (1) Equals the cost impact from application of the outpatient imaging limitation to 125% of the reimbursement for the same service provided in a doctor's office.
- (2) Equals FY2013 health plan fee-for-service claims for all services (ICHP provided encounter data).
- (3) Additional cost divided by FY2013 Total Incurred Claims.

## Footnotes:

- (1) Equals the cost impact from application of the various reimbursement reductions.
- (2) Equals FY2013 health plan fee-for-service claims for all services (ICHP provided encounter data).
- (3) Additional cost divided by FY2013 Total Incurred Claims.

## Footnotes:

- (1) Equals the additional cost in excess of typical annual increase in FQHC utilization due to provider acquisition.  
 (2) Equals FY2013 health plan fee-for-service claims for all services (ICHP provided encounter data).  
 (3) Additional cost divided by FY2013 Total Incurred Claims.

## ***Attachment 6***

### Family Planning Adjustment

Some of the MCOs that participate in the STAR program do not provide family planning services. For these MCOs, family planning service will be provided through FFS. HHSC provided us with a listing of those services that will not be provided by these MCOs. Using base period claims experience, we determined the per member per month cost expected to be represented by these family planning services. The premium rates for those MCOs that do not provide family planning services have been reduced accordingly. The attached exhibit presents a summary of the family planning reduction factors associated with these MCOs

## *Attachment 7*

### Third Party Recoveries

The rating methodology includes a factor to recognize those health plans that do not satisfy a minimum level of recoveries for coordination of benefits. Any plan that did not recover at least 2.0% of claims had its projected claims cost reduced by 2.0% less their actual percentage of recoveries. For example, if a specific health plan has third party recoveries (TPR) of 1.5% of claims, then their projected claims cost would be reduced by 0.5%. Any plan that exceeded the minimum TPR standard of 2.0% had no penalty applied.

The attached chart presents a summary of TPR experience for FY2013.

## *Attachment 8*

### Delivery Supplemental Payment

The rate setting methodology incorporates a risk adjustment technique that is designed to provide uniform treatment of the health plans for costs related to maternity delivery services. Maternity cases occur in several risk groups – Pregnant Women, TANF Adults, and various children age groups. As a result, it is possible for one health plan to enroll a higher percentage of TANF Adults who are pregnant and therefore generally more expensive. In order to recognize the potential inequity that might arise between health plans, HHSC developed this risk adjustment methodology. The goal is to reimburse the plans uniformly for maternity expenses.

The State pays a delivery supplemental payment (DSP) for each delivery in a managed care plan. The amount of the payment is a function of the average delivery cost in the area. The attached exhibit presents the FY2015 DSP payment rates by area.

In order to achieve cost neutrality, the projected cost of maternity expenses is subtracted from the unadjusted premium rates. The resulting adjusted premium rates are the rates actually paid to the HMOs in addition to any DSP amounts.

## *Attachment 9*

### Acuity Risk Adjustment

The rate setting methodology incorporates a risk adjustment technique that is designed to adjust the base community rate in each service area to reflect the health status, or acuity, of the population enrolled in each health plan. The purpose of acuity risk adjustment is to recognize the anticipated cost differential between multiple health plans in a service area by analyzing the health status of their respective memberships. The risk analysis was performed by the University of Florida's Institute for Child Health Policy (ICHP). The methodology used to incorporate the risk adjustment is the Chronic Illness and Disability Payment System (CDPS). The attached exhibits (provided by ICHP) present a summary of the risk adjustment analysis. There is a separate exhibit for each risk group.

The column titled Case Mix on the chart is the risk adjustment factor. It is the ratio of the predicted average cost of the individual health plan's membership divided by the predicted average cost of the entire service area's membership. The risk adjustment factor is applied to the community rate for each health plan and risk group. If necessary, an additional adjustment was made to the risk adjusted community rates to ensure that, in total, they produce the same premium as the community rates.
