I. Introduction

Rudd and Wisdom, Inc. has been retained by HHSC to develop the portion of the managed care capitation rates attributable to pharmacy services for the period November 1, 2016 through August 31, 2017 (this rating period will be referred to as fiscal year 2017 (FY2017) in this report) for those managed care organizations (MCOs) participating in the new Texas Medicaid STAR Kids program. This report presents the rating methodology and assumptions used in developing the pharmacy capitation rates.

Rudd and Wisdom, Inc. has provided actuarial services to the Texas Medicaid program for over 30 years. We have participated in the state's managed care rating process since its inception in 1993. This year, as in previous years, we have worked closely with HHSC in developing the capitation rates documented in this report.

STAR Kids is a new Texas Medicaid managed care program for disabled children that will become effective November 1, 2016. Participation in the STAR Kids program is mandatory for those Medicaid clients under age 21 who meet at least one of the following:

- Receive Social Security Income (SSI) and SSI-related Medicaid.
- Receive SSI and Medicare.
- Receive Medically Dependent Children Program (MDCP) waiver services.
- Receive Youth Empowerment Services (YES) waiver services.
- Receive Intellectual and Developmental Disabilities (IDD) waiver services (e.g., Community Living Assistance and Support Services (CLASS), Deaf Blind with Multiple Disabilities (DBMD), Home and Community-based Services (HCS), and Texas Home Living (TXHmL)).
- Reside in a community-based intermediate care facility for individuals with intellectual disabilities (ICF-IID).

Clients excluded from STAR Kids include:

- Clients age 21 or older.
- Clients enrolled in the STAR Health program or those receiving adoption assistance or adoption services.
- Clients under age 21 residing in the Truman Smith Children's Care Center, a state veteran's home or a state supported living center.

Rudd and Wisdom, Inc. has relied on the following data sources as provided by HHSC, the Texas Department of Aging and Disability Services (DADS), the Texas Department of State Health Services (DSHS), HHSC subcontractors, participating MCOs and their Pharmacy Benefit Managers (PBMs):

- Monthly detailed enrollment files for the period September 2012 through December 2015. These files (developed by HHSC, DADS and DSHS) include all Medicaid clients who would have satisfied the STAR Kids eligibility criteria during the experience period. For each client, the file included Medicaid ID number, eligibility month, county of residence, date of birth, Waiver code (MDCP, IDD or YES), plan code, risk group and Medicare eligibility code.

- Projected monthly STAR Kids enrollment by service area and risk group for FY2017. These projections were prepared by HHSC System Forecasting staff.
- Financial Statistical Reports (FSR) for each program for each participating MCO for fiscal years ending August 31, 2013, August 31, 2014 and August 31, 2015 and the 6-month period ending February 29, 2016. The FSR contains detailed information regarding monthly enrollment, revenue, incurred claims and administrative expenses, as reported by the MCO. This information was used to review the PBM administrative fee assumption.
- Monthly Fee-for Service (FFS) pharmacy claim files for the period September 2012 through March 2016 provided by HHSC and its subcontractor. These files included detailed FFS claims information on all Medicaid pharmacy claims paid during the applicable month.
- Monthly managed care pharmacy claim files for the period September 2012 through March 2016 provided by HHSC. These files included detailed managed care claims information on all Medicaid pharmacy claims paid during the applicable month.
- Summary pharmacy utilization data reports provided by HHSC. These reports were used to confirm that all pharmacy claims were included in our analysis.
- Information from HHSC regarding recent changes in covered prescription drug services and pharmacy reimbursement under the Vendor Drug Program (VDP).
- Information provided by VDP regarding changes in reimbursement for drugs purchased under the 340B Drug Pricing Program.
- Information provided by HHSC regarding claim payments for the drug 17P made under the medical program.
- Information from MCOs regarding administrative cost, pharmacy reimbursement and other provisions included in their PBM contracts.

After accumulating all of the information to be used in the rate setting process, a comparison of the various sources of claims data was performed to check for consistency. We compared (i) the claim amounts in the encounter data files and (ii) the claims utilization reports prepared by HHSC and provided to the MCOs. There was satisfactory consistency between the two claims data sources. Although the above data was reviewed for reasonableness, Rudd and Wisdom did not audit the data.

II. Overview of the Rate Setting Methodology

The actuarial model used to derive the FY2017 STAR Kids pharmacy capitation rates relies primarily on FFS and managed care enrollment and claims experience. A detailed enrollment file was developed which included information on all Medicaid clients who would have satisfied the STAR Kids eligibility criteria during the period September 2012 through December 2015. The resulting file included Medicaid ID number, eligibility month, county of residence, date of birth, Waiver code (MDCP, IDD or YES), plan code, risk group and Medicare eligibility code. The enrollment file was used to select the pharmacy claims to be included in the rating analysis and to determine the number of historically eligible clients by month, service area, risk group and plan type (FFS or managed care).

Using the enrollment file described above, the pharmacy encounter claims database was queried to obtain all claims (FFS and managed care) incurred during the period in which a client would have been eligible for STAR Kids. For each claim, the query included Medicaid ID number, date of service, drug type (brand generic, specialty), number of days supply and payment amount. The enrollment file was then used to add the client's service area (based on county) and risk group to each claim.

The enrollment and claims data was then compiled to produce monthly enrollment, claim counts, days supply and incurred claim amounts by service area, risk group and plan type. The historical claims experience was then analyzed and incurred estimates for the base period (January 1, 2015 through December 31, 2015) were developed. These estimates were then projected forward to the rating period using assumed trend rates. Additional adjustments were made to the historical experience to reflect any programmatic changes in covered services, member cost sharing or pharmacy reimbursement. Administrative expenses, risk margin and premium tax were added to the claims component in order to project the total rating period cost under managed care. These projected total cost rates were then used to produce a set of community rates for each program and service area.

The STAR Kids service areas included in the analysis were as follows:

- Bexar County Service Area
- Dallas County Service Area
- El Paso County Service Area
- Harris County Service Area
- Hidalgo County Service Area
- Jefferson County Service Area
- Lubbock County Service Area
- Nueces County Service Area
- Tarrant County Service Area
- Travis County Service Area
- MRSA Central Service Area
- MRSA Northeast Service Area
- MRSA West Service Area

The risk groups included in the STAR Kids rating analysis are as follows:

- Medically Dependent Children Program (MDCP) waiver
- Intellectual and Developmental Disabilities (IDD) waiver
- Youth Empowerment Services (YES) waiver
- Children Under Age One Year
- Children Ages 1 to 5 Years
- Children Ages 6 to 14 Years
- Children Ages 15 to 20 Years

The pharmacy capitation rates include provision for all prescription drugs purchased through pharmacy providers by managed care clients. Anti-viral agents used for the treatment of Hepatitis C virus and the drug Orkambi are not included in the capitation rates. These drugs are carved out of the capitated arrangement and the cost is reimbursed to the MCOs through a FFS arrangement.

We projected the rating period cost for each service area and risk group by estimating their base period average per-capita claims cost and then applying trend and other adjustment factors (described in Section III below). We added a reasonable provision for administrative expenses, risk margin and premium tax.

Since STAR Kids will be a new program with no historical experience on which to develop HHSC acuity risk adjustment factors, FY2017 will utilize a community rating methodology in setting the pharmacy capitation rates. The community rates vary by service area and risk group but are the same for each MCO in a service area. Attachment 2 presents the summary community rating exhibit for each service area and risk group along with a description of the analysis.

III. Adjustment Factors

This section contains a description of the adjustment factors used in the FY2017 STAR Kids pharmacy capitation rate setting process.

Trend Factors

The rating methodology uses assumed trend factors to adjust the base period (January 1, 2015 through December 31, 2015) claims cost to the rating period (November 1, 2016 through August 31, 2017, or FY2017). The trend rate assumptions were developed by the actuary based on an analysis of recent pharmacy claims experience for those Medicaid clients who would have satisfied the STAR Kids eligibility criteria, along with the actuary's professional judgment regarding anticipated future cost changes. The trend rate assumption varies by risk group but is the same for all service areas.

The trend analysis included a review of utilization and cost experience data paid through March 31, 2016 for those Medicaid clients that would have satisfied the STAR Kids eligibility criteria. Incurred monthly utilization (days supply per member) and cost per service (plan payments per days supply) statistics were developed by program, risk group and drug type (brand, generic and specialty) through December 2015. From this experience, the average annual utilization and cost per service were determined for each of the three 12-month periods ending December 2015.

Only those drugs covered under the capitated arrangement are included in the trend analysis. Anti-viral agents used for the treatment of Hepatitis C virus and the drug Orkambi are not included in the analysis as those drugs are carved out of the managed care contract. In addition, due to the significant variation in the intensity of flu season in recent years, the drug Tamiflu was removed from our trend analysis.

The STAR Kids pharmacy trend assumptions for the remainder of FY2016 and all of FY2017 were developed using the following formula. For each risk group/drug type combination, the utilization and cost per service trend assumptions were set equal to one-third of the experience trend rate for the 12-month period ending December 2014 plus two-thirds of the experience trend rate for the 12-month period ending December 2015. The final cost trend assumption for each risk group was then determined by applying the assumed utilization and cost per service trends by drug type to actual experience for the 12-month period ending December 2015 and combining the results into a single trend assumption.

Attachment 3 is a summary of the pharmacy trend analysis. Please note that the MCOs were provided a detailed trend analysis file which included the historical utilization and cost experience as well as all of the formulas and assumptions used in developing the pharmacy trend assumptions.

340B Program

Effective February 1, 2015, HHSC instituted a new reimbursement methodology for Health Resources and Services Administration (HRSA) 340B Drug Pricing Program drugs (340B drugs) in FFS which significantly reduced pharmacy reimbursement for those

drugs. The MCOs designed their own 340B drug reimbursement revisions in order to achieve comparable savings. The majority of MCOs use the FFS reimbursement methodology. These MCO reimbursement adjustments were implemented on December 1, 2014. Effective June 1, 2016, in response to pharmacy concerns regarding the new low level of reimbursement, HHSC increased pharmacy reimbursement for 340B drugs (from Wholesale Acquisition Cost (WAC) less 60% to WAC less 57%). Attachment 4 presents an analysis of the anticipated impact of these reimbursement changes on STAR Kids pharmacy cost.

Makena

Makena is a prescription drug prescribed to lower the risk of preterm birth. MCOs have commonly used a much less expensive, compounded version of the drug (17P) for years. Recently, the FDA expanded the patent for Makena to effectively prevent the use of 17P. As a result, the utilization of Makena will increase in the Texas Medicaid and CHIP programs. Based on our analysis of the historical claims experience for STAR Kids eligible clients, this change will have no cost impact on STAR Kids.

Unlimited Prescriptions

All Medicaid clients under age 21, including both FFS and managed care, have unlimited monthly prescriptions. As a result, no unlimited prescription adjustment is required for STAR Kids.

Seasonality

The base period used in developing the STAR Kids FY2017 pharmacy capitation rates is a 12-month period (CY2015) while the rating period is a 10-month period (November 1, 2016 through August 31, 2017). Since the months used in the base period may be inherently more or less costly than those of the rating period, it is necessary to include a seasonality factor in the rating analysis. Attachment 5 presents a summary of our seasonality analysis. We selected a single adjustment factor to apply to all service areas and risk groups.

Managed Care Savings

In developing the FY2017 projected pharmacy claims, we have assumed that the base period per-capita pharmacy claims cost for FFS clients will be reduced 5% under managed care. The 5% assumption was developed assuming that overall pharmacy reimbursement under managed care would be 4% lower than that under FFS and that the MCOs will have a positive impact on utilization representing 1% of prescription drug cost. Please note that the managed care savings assumption (5%) applies to base period FFS claims experience only.

Attachment 6, Exhibit A contains a summary of our pharmacy reimbursement analysis. In this analysis, we re-priced a full year (CY2015) of FFS claims for those Medicaid clients who would have satisfied the STAR Kids eligibility criteria. The analysis assumes managed care pharmacy reimbursement provisions (ingredient cost and dispensing fee reimbursement). Our assumed managed care pharmacy reimbursement provisions were

determined based on actual MCO reimbursement rates. Based on this analysis, we concluded that pharmacy reimbursement under managed care is 4% less than that under FFS. These results are similar to those from previous studies of this issue.

Because HHSC determines the formulary and preferred drug list and specifies the prior authorization requirements, the utilization mix between brand and generic is assumed to be the same for FFS and managed care. The utilization mix of chain and independent pharmacies is also assumed to be the same between FFS and managed care.

The assumption that pharmacy utilization would be 1% lower under managed care as compared to FFS is based on an analysis of utilization experience post-pharmacy carve-in as compared to pre-pharmacy carve-in. Exhibit B of Attachment 6 compares pharmacy utilization (days supply per capita) for STAR clients for the period March 1, 2012 through February 2013 (managed care) to that for the period March 1, 2011 through February 2012 (fee-for-service). The analysis shows that the overall average utilization under managed care was approximately 1% lower than that under FFS.

Small Sample Size Adjustments

Enrollment counts by region for both the YES waiver and Under Age One risk groups is too small to be used in establishing rates on an individual service area basis. For these two risk groups we have developed a statewide capitation rate which applies to all MCOs in all service areas.

Risk Adjustment

Capitation rates are established separately by service area and risk group in order to recognize the inherent geographical and demographical variation in the cost of delivering care. The STAR Kids rates have no acuity risk adjustment applied because it is a new program with no historical experience on which to develop acuity risk adjustment factors. The FY2017 STAR Kids rates are community rates which vary by service area and risk group but are the same for each MCO in a service area.

Rebates

The prescription drug cost analysis presented in this report includes the gross pharmacy cost, i.e., it has not been reduced to reflect formulary rebates. HHSC retains the rebate management function for both federal and supplemental rebates.

IV. Administrative Fees, Taxes and Risk Margin

The pharmacy rating methodology includes an explicit provision for administrative services. The amount allocated for administrative expenses is \$1.80 per member per month. This amount is intended to provide for all administrative services performed by the MCO's PBM. This administrative expense assumption is based on reviews of MCO-reported pharmacy administrative costs and MCO contracts with their PBMs.

The capitation rates also include an amount for premium tax (1.75% of capitation) and a risk margin (2.0% of capitation).

The capitation rates included in this document do not include provision for the Affordable Care Act (ACA) Health Insurance Providers Fee. HHSC has developed a procedure for reimbursing the MCOs for (i) the ACA Health Insurance Providers Fee, (ii) any applicable federal income tax impact resulting from payment of the ACA Health Insurance Providers Fee and (iii) any applicable state premium tax impact resulting from payment of the ACA Health Insurance Providers Fee. Such reimbursement will be provided separately based on a CMS-approved methodology.

V. Summary

Attachment 1 presents the results of the FY2017 pharmacy rating analysis for the STAR Kids program.

VI. Actuarial Certification of FY2017 STAR Kids Pharmacy Capitation Rates

I, David G. Wilkes, am a principal with the firm of Rudd and Wisdom, Inc., Consulting Actuaries (Rudd and Wisdom, Inc.). I am a Fellow of the Society of Actuaries and a member of the American Academy of Actuaries. I meet the Academy's qualification standards for rendering this opinion.

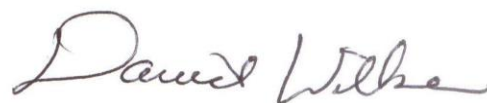

Rudd and Wisdom, Inc. has been retained by the Texas Health and Human Services Commission (HHSC) to assist in the development of their STAR Kids pharmacy rate-setting methodology, assumptions and resulting capitation rates and to provide the actuarial certification required under Centers for Medicare and Medicaid Services (CMS) requirements 42 CFR 438.6(c) (Section 438.4 in the recently approved regulation). The capitation rates for the STAR Kids pharmacy program are effective for the period November 1, 2016 through August 31, 2017.

I certify that the pharmacy capitation rates developed by HHSC and Rudd and Wisdom, Inc. satisfy the following:

- (a) The capitation rates have been developed in accordance with generally accepted actuarial principles and practices;
- (b) The capitation rates are appropriate for the populations and services covered under the managed care contract; and
- (c) The capitation rates are actuarially sound as defined in the regulations.

We have relied on historical experience data and program information provided to us by HHSC. We have reviewed the data for reasonableness but have not audited the data.

Please note that actual health plan contractor experience will differ from these projections. Rudd and Wisdom, Inc. has developed these rates on behalf of the State to demonstrate compliance with the CMS requirements under 42 CFR 438.6(c). Any health plan contracting with the State should analyze its own projected premium needs before deciding whether to contract with the State.

David G. Wilkes, F.S.A., M.A.A.A.

Attachment 2

Community Rating Analysis

The following exhibits present a summary of the pharmacy rating analysis performed for each service area and risk group under the new Medicaid STAR Kids program. HHSC utilizes a community rating methodology in setting the pharmacy capitation rates. The community rates vary by risk group and service area but are the same for each MCO in a service area.

Below is a brief description of this attachment. The following exhibits present the derivation of the FY2017 STAR Kids pharmacy community capitation rates for each service area and risk group.

Exhibit A - Bexar County Service Area
Exhibit B - Dallas County Service Area
Exhibit C - El Paso County Service Area
Exhibit D - Harris County Service Area
Exhibit E - Hidalgo County Service Area
Exhibit F - Jefferson County Service Area
Exhibit G - Lubbock County Service Area
Exhibit H - Nueces County Service Area
Exhibit I - Tarrant County Service Area
Exhibit J - Travis County Service Area
Exhibit K - MRSA Central Service Area
Exhibit L - MRSA Northeast Service Area
Exhibit M - MRSA West Service Area
Exhibit N - Statewide

The actuarial model used to derive the FY2017 STAR Kids pharmacy capitation rates relies primarily on FFS and managed care enrollment and claims experience. A detailed enrollment file was developed which included information on all Medicaid clients who would have satisfied the STAR Kids eligibility criteria during the period September 2012 through December 2015. The resulting file included Medicaid ID number, eligibility month, county of residence, date of birth, Waiver code (MDCP, IDD or YES), plan code, risk group and Medicare eligibility code. The enrollment file was used to select the pharmacy claims to be included in the rating analysis and to determine the number of historically eligible clients by month, service area, risk group and plan type (FFS or managed care).

Using the enrollment file described above, the pharmacy encounter claims database was queried to obtain all claims (FFS and managed care) incurred during the period in which a client would have been eligible for STAR Kids. For each claim, the query included Medicaid ID number, date of service, drug type (brand generic, specialty), number of days supply and payment amount. The enrollment file was then used to add the client's service area (based on county) and risk group to each claim.

The enrollment and claims data was then compiled to produce monthly enrollment, claim counts, days supply and incurred claim amounts by service area, risk group and plan type. The historical claims experience was then analyzed and incurred estimates for the base period (January 1, 2015 through December 31, 2015) were developed. These estimates were then projected forward to

the rating period using assumed trend rates. Additional adjustments were made to the historical experience to reflect any programmatic changes in covered services, member cost sharing or pharmacy reimbursement. Administrative expenses, risk margin and premium tax were added to the claims component in order to project the total rating period cost under managed care. These projected total cost rates were then used to produce a set of community rates for each program and service area.

Trend Analysis

The pharmacy rating methodology uses assumed trend factors to adjust the base period (January 1, 2015 through December 31, 2015) claims cost to the rating period (November 1, 2016 through August 31, 2017, or FY2017). The trend rate assumptions were developed by the actuary based on an analysis of recent pharmacy claims experience for those Medicaid clients who would have satisfied the STAR Kids eligibility criteria, along with the actuary's professional judgment regarding anticipated future cost changes. The trend rate assumption varies by risk group but is the same for all service areas.

The trend analysis included a review of utilization and cost experience data paid through March 31, 2016 for those Medicaid clients that would have satisfied the STAR Kids eligibility criteria. Incurred monthly utilization (days supply per member) and cost per service (plan payments per days supply) statistics were developed by program, risk group and drug type (brand, generic and specialty) through December 2015. From this experience, the average annual utilization and cost per service were determined for each of the three 12-month periods ending December 2015.

Only those drugs covered under the capitated arrangement are included in the trend analysis. Anti-viral agents used for the treatment of Hepatitis C virus and the drug Orkambi are not included in the analysis as those drugs are carved out of the managed care contract. In addition, due to the significant variation in the intensity of flu season in recent years, the drug Tamiflu was removed from our trend analysis.

The STAR Kids pharmacy trend assumptions for the remainder of FY2016 and all of FY2017 were developed using the following formula. For each risk group/drug type combination, the utilization and cost per service trend assumptions were set equal to one-third of the experience trend rate for the 12-month period ending December 2014 plus two-thirds the experience trend rate for the 12-month period ending December 2015. The final cost trend assumption for each risk group was then determined by applying the assumed utilization and cost per service trends by drug type to actual experience for the 12-month period ending December 2015 and combining the results into a single trend assumption.

The following exhibit presents a summary of the pharmacy trend analysis. Please note that the MCOs were provided a detailed trend analysis workbook which included the historical utilization and cost experience as well as all of the formulas and assumptions used in developing the pharmacy trend assumptions.

Below are the selected annual STAR Kids pharmacy cost trend assumptions for each risk group.

Attachment 4

340B Pricing

Effective February 1, 2015, HHSC instituted a new reimbursement methodology for Health Resources and Services Administration (HRSA) 340B Drug Pricing Program drugs (340B drugs) in FFS which significantly reduced pharmacy reimbursement for those drugs. The MCOs designed their own 340B drug reimbursement revisions in order to achieve comparable savings. The majority of MCOs use the FFS reimbursement methodology. These MCO reimbursement adjustments were implemented on December 1, 2014. Effective June 1, 2016, in response to pharmacy concerns regarding the new low level of reimbursement, HHSC increased pharmacy reimbursement for 340B drugs (from Wholesale Acquisition Cost (WAC) less 60% to WAC less 57%). The following exhibit presents an analysis of the anticipated impact of these reimbursement changes on STAR Kids pharmacy cost.

Footnotes:

- (1) Equals total incurred FFS and managed care pharmacy claims during the experience period.
- (2) Equals the estimated cost impact from revised 340B pharmacy reimbursement change.
- (3) Additional cost divided by Incurred Claims.

Attachment 5

Seasonality

The base period used in developing the STAR Kids FY2017 pharmacy capitation rates is a 12-month period (CY2015) while the rating period is a 10-month period (November 1, 2016 through August 31, 2017). Since the months used in the base period may be inherently more or less costly than those of the rating period, it is necessary to include a seasonality factor in the rating analysis.

This attachment presents a summary of our seasonality analysis. The following exhibit shows month enrollment, incurred claims and per-capita incurred claims by risk group. The final page of the exhibit provided the calculation of our selected seasonality adjustment factor. We selected a single adjustment factor to apply to all service areas and risk groups.

Attachment 6

Managed Care Savings

In developing the FY2017 projected pharmacy claims, we have assumed that the base period per-capita pharmacy claims cost for FFS clients will be reduced by 5% under managed care. The 5% assumption was developed assuming that overall pharmacy reimbursement under managed care would be 4% lower than that under FFS and that the MCOs will have a positive impact on utilization representing 1% of prescription drug cost. Please note that the managed care savings assumption (5%) applies to base period FFS claims experience only. No managed care savings factor is applied to managed care base period experience.

Exhibit A of this attachment contains a summary of our pharmacy reimbursement analysis. In this analysis, we re-priced CY2015 FFS claims for those Medicaid clients who would have satisfied the STAR Kids eligibility criteria. Our assumed managed care pharmacy reimbursement provisions were determined based on a review of actual MCO reimbursement rates. Based on this analysis, we concluded that pharmacy reimbursement under managed care is 4% less than that under FFS. These results are similar to those from previous studies of this issue.

Because HHSC determines the formulary and preferred drug list and specifies the prior authorization requirements, the utilization mix between brand and generic is assumed to be the same for FFS and managed care. The utilization mix of chain and independent pharmacies is also assumed to be the same between FFS and managed care.

The assumption that pharmacy utilization would be 1% lower under managed care as compared to FFS is based on an analysis of utilization experience post-pharmacy carve-in as compared to pre-pharmacy carve-in. Exhibit B of this attachment compares pharmacy utilization (days supply per capita) for STAR clients immediately preceding carve-in (March 1, 2011 through February 2012) to that for the period immediately after carve-in (March 1, 2012 through February 2013). The analysis shows that the overall average utilization under managed care was approximately 1% lower than that under FFS.

Notes:

- (1) Reprice actual CY2015 FFS experience assuming the following
 - (a) Brand Drugs - Ingredient Cost = AWP - 16.0%, Disp. Fee = \$1.50 per script
 - (b) Generic Drugs - Ingredient Cost = same ingredient cost per unit per NDC as experience in Managed Care, Disp. Fee = \$1.50 per script
- (2) These claim amounts were assumed to be the same under managed care and FFS
 - (a) U&C
 - (b) Compounds
 - (c) Paid Amount, Ingredient Cost or Units = 0
 - (d) NDC with no managed care experience
- (3) Claims with no matching AWP or abnormal discounts were assumed to have the same managed care discount as claims that were repriced.

Index for State of Texas Medicaid Managed Care Rate Setting STAR Kids Pharmacy Carve-in State Fiscal Year 2017

This index includes the page numbers from the report titled “State of Texas Medicaid Managed Care Rate Setting STAR Kids Pharmacy Carve-in State Fiscal Year 2017” for the applicable sections of the 2016 Medicaid Managed Care Rate Development Guide. The section numbers used below are in reference to the corresponding sections of the 2016 Medicaid Managed Care Rate Development Guide.

1. General Information

- A. Rates are for the period November 1, 2016 through August 31, 2017 (FY2017). The new STAR Kids program is scheduled to be implemented November 1, 2016.
- B. The above referenced report is intended to meet this requirement.
- C. This index is intended to meet this requirement
 - D.i. See page 10 of the report.
 - D.ii. See Attachment 1 of the report.
 - D.iii. Not applicable.
 - D.iv(a). See pages 1, 3 and 4 of the report.
 - D.iv(b). See page 1 of the report.
 - D.iv(c). See page 1 of the report.
 - D.iv(d). Not applicable.
 - D.iv(e). See page 1 of the report.

2. Data

- A.i(a). See pages 1 and 2 of the report.
- A.i(b). See pages 1 and 2 of the report.
- A.i(c). See pages 1 and 2 of the report.
- A.i(d). Not applicable.
- A.ii(a). See page 2 of the report.

A.ii(b). See page 2 of the report.

A.ii(c). See page 2 of the report.

A.iii. Not applicable.

A.iv. Not applicable.

A.v. The MCOs were provided a trend analysis described on page 5 and Attachment 3 of the report.

B.i. See page 2 of the report.

B.ii. See page 3 of the report.

B.iii. See page 2 of the report.

B.iv. See pages 5 through 7 of the report.

B.v. See page 4 of the report.

3. Projected Benefit Costs and Trends

A.i. See pages 3 and 4 and Attachment 2 of the report.

A.ii. Not applicable.

B.i(a). See page 5 and Attachment 3 of the report.

B.i(b). See page 5 and Attachment 3 of the report.

B.i(c). See page 5 and Attachment 3 of the report.

B.ii(a). See page 5 and Attachment 3 of the report.

B.ii(b). Not applicable.

B.ii(c). See page 5 and Attachment 3 of the report.

B.iii. See page 5 and Attachment 3 of the report.

B.iv. See page 5 and Attachment 3 of the report.

B.v. See page 5 and Attachment 3 of the report.

C. Not applicable.

D. All enrollment and claims experience from retrospective eligibility periods was included in the historical data used to develop the rates. No retrospective eligibility adjustment factor is required because (i) all experience data is included and (ii) the retrospective eligibility requirements have remained the same during the experience period.

E. See Attachment 2 of the report.

F. See pages 5 through 7 and Attachments 3 through 6 of the report.

G. See pages 5 through 7 and Attachments 3 through 6 of the report.

4. Pass-Through Payments

A. Not applicable.

B. Not applicable.

C. Not applicable.

5. Projected Non-Benefit Costs

A. See page 8 of the report.

B.i. See page 8 of the report.

B.ii. Not applicable.

B.iii. See page 8 of the report.

B.iv. See page 8 of the report.

B.v. Not applicable.

C. See page 8 of the report.

D. See page 8 of the report.

6. Rate Range Development

A. Not applicable.

B. Not applicable.

7. Risk Mitigation, Incentives and Related Contractual Provisions

A. Not applicable

B. See page 7 of the report.

C. Not applicable.

D. Not applicable.

E. Not applicable.

F. Not applicable.

G. Not applicable.

8. Other Rate Development Considerations

A. Not applicable.
