## HHSC Provider Reimbursement Rate Tables Published

The Health and Human Services Commission (HHSC) Provider Finance Department (PFD) is responsible for setting Medicaid and other reimbursement rates for other state programs.

Provider reimbursement rate tables have been published and are available at the [Provider Finance Department website](#). These rate tables historically were included in the "Consolidated Budget Report" which is no longer required.

The rate tables contain overall percent rate changes required to recognize increases/decreases in costs incurred by providers based on various established methodologies. The estimated fiscal impact of a one percent rate change can be used to estimate most of the fiscal impact to the state for each one percent rate increase or decrease in provider reimbursement.

In addition to the rate tables, information is provided on several specific rate issues, including supplemental payment programs, hospital inpatient rates, nursing facility financing, long-term services and supports and compensation for attendant workers.
